

INTRODUCING SIMVS NUCLEUS

One Platform - Simulate, Communicate, Motivate.

The New SimVS All-In-One Nucleus Platform supports educators in delivering realistic scenarios by allowing for simple incorporation of a wide range of dynamic physiological data reflecting patient conditions. An easy-to-use solution for realistic, reliable and seamless simulation performance at an affordable price.

SimVS Hospital Virtual Signs Platform

Supports realistic scenario performance by incorporating realistic patient monitor & defibrillator interfaces into their simulations to aid in the development of student critical thinking skills.

SimVS NurseCall Intercom System

A complete two-way communication system that allows instructors to send and track responses to alarm sent to the bedside, allows students to call Codes and enables communication directly via the SimVS Intercom.

SimVS Diagnostic Essentials

Perfect for bedside assessment! Consolidates multiple point of care devices (monitor, glucometer, thermometer, pulse oximeter) into one easy-to-use package.
