

SIMRESCUE

THE AUTO EXTRICATION SYSTEM

Simulate Patient Extrication from a Motor Vehicle Accident with SimRescue The Auto Extrication System

Contact Your DiaMedical USA Account Manager to Request a Quote!

NEARLY 40,000 AMERICANS LOSE THEIR LIVES TO MOTOR VEHICLE ACCIDENTS EVERY YEAR

Emergency Medical Service providers and paramedics provide patient care in a variety of settings from calm to chaotic. However, when it comes to responding to an emergent motor vehicle accident, every second matters. With the SimRescue™ Auto Extrication System, students and professionals can safely practice a variety of patient removal scenarios! SimRescue™ is the only auto extrication system on the market that was specifically created for patient extrication. From basic seatbelt cutting simulations to lethal roll-over accidents, SimRescue™ provides EMS professionals with all of the tools to feel confident when responding to an auto extrication call.
