- Portable, Lightweight, Self-Contained, Battery-Operated, Water-Resistant

SKU	Description	Pkg	Price
RES012030	Video Laryngoscope	1 ea	\$2,295.00

#### Video Laryngoscope Kit Benefits

- Affordable: The King Vision aBlade is an excellent solution to solve the issue of limited availability of advanced visualization solutions in the OR.
- Durable: King Vision aBlade has been designed to be your primary tool for all intubations.
- Video Output Cable: Compatible with external monitor and recording devices.
- Robust: The full-color, non-glare display can resist repeated cleaning.
- **Portable:** King Vision is light weight, self-contained, battery operated and water resistant with a continuous use time of about 80 minutes.
- Safe: aBlades are individually packaged. Each blade is disposable, eliminating concerns of cross contamination.

# SimVS EMS Virtual Diagnostic Platform

SimVS EMS Virtual Diagnostic Platform is a responsive simulation platform incorporating monitor, defibrillator and transport ventilator functions to promote student development of critical thinking skills in an ultrarealistic simulation setting.

SimVS enables instructors to manipulate patient vital signs and diagnostic results, empowering students to use their skills to react accordingly and treat the patient in a realistic manner. Additionally, SimVS allows instructors to convert any manikin or standardized patient into a high-fidelity simulator!

\*No annual fees! Lifetime software upgrades

SKU	Description	Pkg	Price
DG073218	SimVS EMS; For Training Purposes Only	1 ea	\$5,995.00
DG073214	SimVS EMS Plus; For Training Purposes Only	1 ea	\$6,995.00

**Transport Ventilator** 

#### SimVS EMS Features

#### Instructor Tablet

Controls the physiological displays of monitors empowering educators to influence student care decisions

#### **Realistic Student Monitors**

Up to four (4) unique monitor interfaces including ultrarealistic Zoll X or Lifepak 15 Defibrillator, GE Patient Monitor and transport ventilator

#### **Carrying Case**

Durable bag that is configured to function identically to a defibrillator bag students will find throughout their training

#### Scenario Booklet

Comprehensive simulations specifically designed to be used alongside the SimVS EMS Platform

#### SimVS ECG Cables

Simulated ECG cables connect to SimVS bag to reinforce learning objectives required for starting an 12-lead ECG

#### **Training Accessories**

Includes essential diagnostic equipment students need to provide a comprehensive patient exam

DEFIBRILLATOR

**AED**CHECK

MONITORING & DIAGNOSTICS

Lifeline ARM Automated Chest Compression (ACC) device performs mechanical chest compressions when effective manual CPR is not possible. In an emergency situation, the Lifeline ARM when used as an adjunct to manual CPR, provides extended CPR with minimal interruptions when fatigue, insufficient personnel or patient transport (e.g., ambulance, intra-hospital) may prohibit the delivery of effective/consistent compressions to the victim. Its award winning design provides portability, speedy deployment and delivers precise CPR with unmatched operating times.

- Single piece design provides increased structural integrity during compressions
- Simplified Control Panel requires just two steps to initiate mechanical CPR
- "Run Continuous" Setting performs chest compressions only without pauses for ventilation
- "Run with Breaths" Setting utilizes programmed pauses for rescue breaths
- Long runtime battery pack life with fast recharge time

•	External AC power adapter also recharges the
	battery pack during use

- Single piece design enhances its usability and provides an incredibly strong platform for performing mechanical CPR
- Comes packed in a red canvas carrying case designed for backpack portability
- Manufactured to withstand small particulates and water spray
- Meets military standards for shock and vibration testing

SKU	Description	Pkg	Price
DF028329	Hands-Free CPR Device	1 ea	\$12,995.00

#### What's Included?

- Complete Lifeline Arm Hands-Free **CPR** Device
- Backboard
- **Battery Pack** Power Module

- Stabilization Strap

- Red canvas carrying case

#### **Physio-Control LUCAS 3 Chest Compression System**

LUCAS 3 Chest Compression System delivers high-performance, continuous chest compressions with less strain, micromanagement and risk for the caregiver. The LUCAS chest compression system, provides benefits both to the cardiac arrest patient and the resuscitation team. The LUCAS device extends the reach of care by maintaining chest compressions during transport to advanced lifesaving therapies, including ECMO or PCI in the cath lab. It can improve provider safety, avoiding fatigue over long durations and reducing transport risks by allowing caregivers to sit belted. And it can increase the efficiency of caregiving teams, calming the scene and providing an extra pair of hands so you can focus on the patient and underlying conditions.

- Deploys easily and quickly with a low-profile back plate for fast, smooth patient applications
- Ability to configure settings to meet specific EMS protocols
- Adjustable ventilation alerts, pause length and count
- Easily access and share post-event data
- Easy to store, clean and carry
- Ability to integrate with CODE-STAT 11 data review software

•	A median of only seven (7) seconds of
	interruption demonstrated when transitioning
	from manual to mechanical CPR in clinical use

- Connects wirelessly to the LIFENET System
- Timer to remind rhythm and pulse checks
- Sets auto-lowering and pressure pad parameters to your preferences
- Straps secure patient arms and device during transport
- Spacious support structure accommodates larger patients

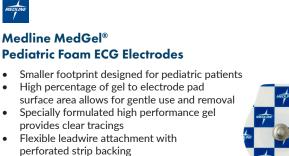

SKU	Description	Pkg	Price

Scan to Watch SimRig<sup>®</sup> in Action!

#### Why Educators Love SimRig<sup>®</sup> The Ambulance Trainer

• Ultrarealistic Training:

SimRig<sup>®</sup> helps students understand the confines of an ambulance and enables them to provide life saving care within the spatial limitations of a rig.

#### • Train Anywhere:

The Mobile SimRig<sup>®</sup> is designed for EMS educators traveling to multiple locations. This mobile trainer arrives at your facility road ready and can be trailered behind your vehicle.

SimRig<sup>®</sup> The Ambulance Trainer provides an unparalleled level of realism and precision to EMS training, allowing students to enter the workforce with a complete understanding of how to operate within an ambulance.

#### **Established Brand**

DiaMedical is at the forefront of simulation training, providing tools for training and simulation.

#### **Unparalleled Realism**

SimRig<sup>®</sup> is built to precisely mimic a real ambulance. All aspects, including the back door and bumper, are built to actual specifications of a road ready ambulance.

#### **Facilitates Group Learning**

SimRig's® open design and HD camera system facilitates instructor and student observation.

#### **Scientifically Backed**

Studies have shown that hands-on simulation training can help enhance performance and rescue errors in critical life-saving emergencies.

#### SimRig<sup>®</sup> The Classroom Ambulance Trainer

Teach with an ambulance in your classroom! SimRig<sup>®</sup> The Classroom Ambulance Trainer is uniquely designed to be assembled in any classroom or training center in just two (2) days! The compact design allows for students to experience the hardships of working within the confined space of a real ambulance before their first day on the job.

- Modular design allows for the SimRig® to be installed just two (2) days
- Functioning action control station
- Flip-Up Bumper built to the specifications of an actual ambulance
- Integrated cot mounting apparatus
- Functioning suction and simulated oxygen
- Over thirty (30) additional standard features
- Lifetime structural warranty and five (5) year limited warranty on all other components

#### SimRig<sup>®</sup> The Mobile Ambulance Trainer

Simulate the entire call process anywhere! SimRig® The Mobile Ambulance Trainer is designed to be transported to different training sites and locations. By being completely mobile, instructors can simulate every aspect of an emergency call from a parking lot, shopping center, simulation site or even streetside.

- Can be transported behind any trailer compatible vehicle
- Functioning action control station
- Flip-Up Bumper built to the specifications of an actual ambulance
- Integrated cot mounting apparatus
- Functioning suction and simulated oxygen
- Over thirty (30) additional standard features
- Arrives with standard trailer hitch and functioning electrical components
- Lifetime structural warranty and five (5) year limited warranty on all other components

# SimRescue<sup>™</sup> The Auto Extrication System

Emergency Medical Service providers and paramedics provide patient care in a variety of settings from calm to chaotic. However, when it comes to responding to an emergent motor vehicle accident, every second matters. With SimRescue™ The Auto Extrication System, students and professionals can safely practice patient removal scenarios! SimRescue™ is the only auto extrication system on the market that was specifically created for patient extrication. From basic seatbelt cutting simulations to lethal roll-over accidents, SimRescue™ allows EMS professionals to feel confident when responding to an auto extrication call.

#### EMS-Man Manikin Scenario Training

#### Airway Management

- Head tilt, chin lift, jaw thrust
- Oral and nasopharyngeal airway suctioning
- Insertion of oral, supraglottic and nasopharyngeal airways
- Laryngoscopy and endotracheal intubation
- BVM ventilation
- Needle thoracentesis with chest seal application

#### Immobilization

- Application of spinal collar, pelvic binder and traction devices
- Manual in-line stabilization

#### Hemorrhage Management

- Thigh/groin wound packing with application of direct and indirect pressure
- Tourniquet application for hemorrhage control
- Removable lower leg amputation with bleeding capability
  - Simulated circulation assessment

#### **Other Features**

- IO access in bilateral humeral heads and tibias
- Chest compressions
- Application of AED/defibrillator pads
- Patient transfers, dressing, bed baths

# TRAINING & SIMULATION

# CAE CAE Ares Emergency Care Manikin

CAE Ares is mid-fidelity manikin designed to fulfill the requirements for ALS, ACLS and emergency care team training. Ares is portable, lightweight and offers a variety of key features needed for emergency care simulation including realistic articulation, bilateral and unilateral chest rise, and ECG monitoring.

#### Standard Equipment:

- CAE Ares wireless and tetherless manikin
- Male and female gender configuration
- Physiological Modeling for CAE Maestro
- One wireless StethoSym
- Instructor tablet
- CAE Maestro software suite—instructor-driven (manual mode) only
- One CAE Maestro Standalone license (manual mode)
- Six (6) CAE simulated clinical experiences (SCEs)
- One (1) year CAE assurance warranty

#### **Key Features**

Neuro: Tristate pupils and optional SymEyes

Articulation: Realistic articulation, range of motion in hips, knees, ankles and shoulders

Airway: Bag-valve-mask ventilation, orotracheal and nasotracheal intubation, placement of various airway adjuncts, endotracheal tube intubation, retrograde and fiberoptic intubation, transtracheal jet ventilation, needle and surgical cricothyrotomy, tracheostomy, right main stem intubation with detection, stomach distention with esophogeal intubation and laryngospasm (manual)

**Breathing:** Spontaneous breathing, bilateral and unilateral chest rise and fall, lung auscultation, upper airway sounds and bilateral needle decompression

IM Medication Administration: Four (4) intramuscular sites

Urinary: Urinary catheterization without fluids and interchangeable genitalia

Cardiac: 4-Lead ECG monitoring with real equipment, 12-lead dynamic ECG display, defibrillation, cardioversion and pacing using live equipment via external defib box (optional)

**Circulation:** Unilateral blood pressure measurement by auscultation and palpation, bilateral carotid and femoral pulses, unilateral radial and brachial pulses with variable pulse strength

**CPR:** CPR compressions generate palpable pulse, blood pressure, waveform and ECG artifacts, realistic chest compression depth and resistance, software metrics detect hand placement, rate and depth of compressions, recoil, ventilators and ventilation

# Simulaids

- Simulaids<sup>®</sup> Airway Management Trainer with Board

  Detailed respiratory anatomy with breakout teeth, tongue edema and laryngospasm
- Accepts up to size 8.0 oral and nasal endotracheal tubes
- Anatomical stomach swells with esophageal intubation or excessive BVM pressure during rescue breathing
- Vomiting capability requires students to clear the airway and prevent aspiration
- Includes hard carry case
- Three (3) year warranty

SKU	Description	Pkg	Price
MS029922	Adult Airway Trainer with Board	1 ea	\$2,137.95

#### 

#### Laerdal<sup>®</sup> Airway Trainer

- Simulates real-world complications when practicing a variety of intubation, ventilation and suction techniques
- Provides visual inspection of lung expansion and auscultation of breath sounds
- Simulates stomach inflation and vomiting situations
- One (1) year warranty

SKU	Description	Pkg	Price
MS024203	Adult Airway Trainer	1 ea	\$2,649.00

#### Simulaids

#### Simulaids® Tension Pneumothorax Simulator

- Practice proper needle insertion to enable built-up air pressure to escape the thorax
- Foot pump, replacement two (2) piece pleural chamber, rib cage and lifelike skin
- Soft carry bag included
- Procedural needle not included

SKU	Description	Pkg	Price
MS046901	Tension Pneumothorax Simulator	1 ea	\$774.95

#### Life form.

#### Life/form<sup>®</sup> Chest Tube Manikin

- Teach the theory, anatomy and skills needed to manage pre-hospital chest trauma and ongoing chest tube maintenance
- Teach the concepts and mechanics of closed water-seal drainage systems
- Three (3) year warranty

SKU	Description	Pkg	Price

# Scenarios In Seconds® **Complete Pediatric Training System**

A Complete Peds Training System for Educators! One-hundred (100) scenarios ranging from a 10-year-old with a gunshot wound to a newborn in respiratory arrest, and even a preemie! Each scenario has a corresponding life-size "Mani-Kid." Pick a scenario, lay out the "Mani-Kid" and have your staff practice using whatever color-coding system your facility has. That's it. Education done!

This teaching tool offers a unique hands-on and visual experience that is both challenging and fun for all levels of healthcare providers.

- Fifteen (15) full-color child-life-sized boards, "Mani-Kids", representing all nine (9) colors in • the Broselow and Handtevy color-coding systems, plus a bonus preemie, as well as five (5) permanently-moulaged Mani-Kids
- One-hundred (100) real-life pediatric medical and trauma scenario cards with three (3) levels of . training - Basic, Advanced and Expert
- Twenty-five (25) continuing education credits for one-hundred (100) users
- One-hundred (100) online short quick tip peds videos to go with each and every scenario card Pedi-Med Practice Pack - refillable practice medications with included customizable labels for all
- medications utilized in the Scenarios In Seconds® system
- Reproducible answer sheet note pad for individual learner for one single scenario .
- Reproducible multiple scenario answer sheet pad, for a single learner to do 3 scenarios at a time
- Five (5) Broselow-Luten color-coded length-based system tapes (most current tape available) Fifteen (15) Boxed of Pedi-Wheels - CD sized pocket pediatric "cheat sheets" that offers easy to • find essential peds information
- **Comprehensive Educator's Manual**
- 11" x 17" Flexible plastic frame to slide in an individual scenario card with attached timer function

# Second

#### WHY INSTRUCTORS LOVE SCENARIOS IN SECONDS®

Kids who are sick are scary. Sick kids with their lives in your hands are terrifying! Give your students the confidence they need by providing them with the right tools to learn. Pick out a scenario for the week, lay out the corresponding Mani-Kid and you're done.

# IMPROVE REACTION TIME

Every healthcare setting has a color-coding system, whether it may be Broselow or Handtevy. But, if you don't utilize them throughout your students' education how will they know what to do when they face their first emergency? Scenarios in Seconds<sup>®</sup> builds muscle memory that books can't teach!

# HANDS-ON & VISUAL LEARNING

To learn, students need to do! Scenarios in Seconds® allows medical professionals to physically touch, test and practice with tools they have, but rarely use. Mani-Kids are full-sized, light weight, and foldable foam boards that give students a visual reference.

#### 요구요 MULTIPLE WAYS TO TRAIN

Pick and chose age levels, trauma V.S. medical, create a disaster simulation, etc. However you want your students to keep vigilant. Instructors are provided with all the material they need, all they have to do is pick a date and time to run the simulation!

We give you a Mani-Kid for each color zone/age group, and fifty-two (52) scenarios your students can use to perfect their skills, blank answer keys and a comprehensive user manual, and even competencies and objectives. Everything you need is in one easy-to-carry bag.

# HELP AVOID MEDICAL MALPRACTICE

Students need to be able to rely on the tools provided to them. If they don't truly know how to use them in their education how will they know how to use them in a clinical setting? Avoid mistakes when they really count with Scenarios in Seconds<sup>®</sup>.

#### Simulaids

#### Simulaids<sup>®</sup> Advanced Military Casualty Simulation Kit

Victims can appear to be in shock or pain, traumatized, lacerated, burned, bleeding or dirty. Bleeding wounds have reservoir pump assemblies to assure a continuous lifelike flow of simulated blood.

# EMERGENCY BAGS

#### HOW TO ORDER

DiaMedical accepts orders online or by phone, fax, email or mail. Contact information and mailing address are available at the bottom of this page.

#### PAYMENT TERMS

Net 30 day payment terms or terms acceptable to your facility. DiaMedical accepts valid purchase order numbers or payment by credit card (VISA, MasterCard, American Express). Payment must be made in U.S.D.

#### PRICES & PRICE CHANGES

Prices listed may not include freight or handling fees and are subject to correction or change without notice. In the case of substantial increases, customers will be notified on an as needed basis. However, we always try to keep our prices as low as possible.

#### ΤΑΧ

DiaMedical collects sales tax on all of its products. If your facility qualifies for a tax exemption you must email a completed tax exemption certificate to accounting@diamedical.com prior to your order being invoiced.

#### WARRANTY

DiaMedical provides the warranty of the manufacturer or a minimum one (1) year limited warranty on all of its products.

#### SHIPPING & HANDLING

Shipping charges may vary depending on distance, value, weight and cargo. All orders are shipped UPS Ground or common carrier unless otherwise specified. Shipping charges will be added to your order total. Should you need to know the shipping charges in advance, please contact DiaMedical for a shipping cost to be added to your original quote. Items may ship separately.

#### RETURNS

In most cases we can accept returns and provide credit for all purchases returned within 30 days. In the case where we operate as a distributor, we extend the return policies as set forth by our manufacturer or supplier.

#### INTERNATIONAL ORDERS

DiaMedical can ship internationally. Canadian orders will be shipped UPS Standard unless otherwise specified. All other international orders will be shipped by DHL or USPS unless otherwise specified. Please note that orders shipping through the USPS are only traceable through the United States.

#### USE OF PRODUCTS

All products purchased from DiaMedical are intended for educational purposes only and to be used under the supervision of a qualified instructor. All instructional products are not intended for human or animal use, injection, application and/or ingestion. Purchaser further agrees that all products will be used for their intended instructional purposes only, in a safe and legal manner consistent with all applicable state and federal laws and Purchaser's own internal health and safety policies.

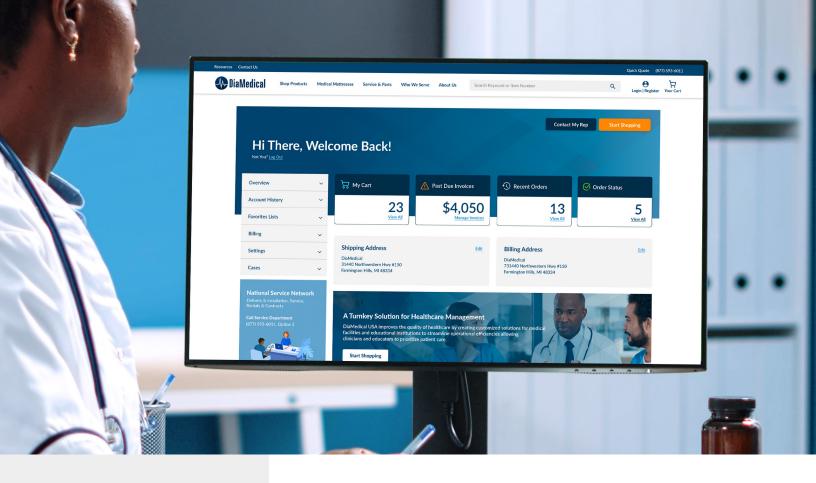

#### **PRODUCT SPECIFICATIONS**

DiaMedical reserves the right to change product specifications on all items without notice. All efforts are made to display accurate product information, however, due to uncontrollable manufacturing conditions, product specifications and colors are subject to change without notice. Actual product color may differ from catalog product color.

#### **BID LIST NOTICE**

DiaMedical wishes to be placed on any bid list. We assure prompt replies on all bids. Please contact us if our W-9 and/or vendor registration information is needed.
